### **DETAILED ACTION**

Claims 27-122 are pending in this application.

#### ***Restriction Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-80 and 92-122, drawn to liquid concentrated hormone, classified in class 424, subclass 400.
- II. Claims 81-91, drawn to powdered concentrated hormone composition, classified in class 424, subclass 489.

The inventions are independent or distinct, each from the other because:

Inventions I and II are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are related with respect to function, i.e. a concentrated hormone composition; however, they are mutually exclusive because they have different physical forms. Group I is directed to a concentrated hormone composition in a liquid form and Group II is directed to a concentrated hormone composition in a powdered form. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Gamson on August 18, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
